

Guest book

Dear John,

My wife and I met you at the Bedford County Fair and she surprised me by buying your book and giving it to me that day. I am on the last chapter and wanted to tell you I really liked it! I am 49 years old and can relate the politics and policys of law-makers and leaders that you mention in the prisons to SO MANY different areas of life. The lack of accountability has been a cancer in our country for the last 40 years. Self discipline, respect, and responsibility have gone out the window on all levels. I hold our leaders responsible for this. To be a leader you should be the best example and ALWAYS strive for the good and the right for all. I personally believe that without God as our supreme authority, personally and as a nation, that this is the results we end up with. I believe it is inevitable from any angle. Thank-You for putting this book out there. It gave me a look inside our prison walls, and also warned me of the trouble coming our way. It was especially nice meeting you at Bedford, Pa. Sincerely, Steve Marks
